

"One thing I have learned through all this is that no person, male or female, living alone should do so without wearing a simple little (Rescue Alert) device... You don't have to be OLD to need it, just living alone is enough. Always remember -IT COULD HAPPEN TO YOU TOO."

testimonials

RESCUE ALERT
Medical Alert Systems

"Five hours Grandma laid there. I called and called but there was no answer... finally I left work and went over to her place. There was no answer at the door, so I used my key and went in. There she was on the kitchen floor, her hip broken, and unable to get up. I wanted to make sure this would never happen again!"

Grandma wanted her independence and didn't want to burden the family. Your medical alarm made it possible for her and our family to live our own lives -yet still provided 24-hour peace of mind for her...and me."

who should have a Rescue Alert?

If one or more of these apply to you or a loved one Rescue Alert may be your best source of help without giving up your independence.

- + **Home alone for more than 2 hours at a time**
Studies show that 60% of falls happen in the home, but seniors who seek immediate help for their injuries have a better chance of returning to a normal, independent lifestyle.
- + **Age 65+**
According to the CDC (Center for Disease Control), every year one in three adults over 65 years of age experiences a fall. The good news is that a lot of injuries that are caused by a fall could be treated if help is sought out immediately.
- + **In need of a source for help at a low cost**
The national average cost for Assisted Living Facilities is over \$3,000 a month. With Rescue Alert, you can get the security and the independence for a substantially lower cost.

Why Cell Phones Are Not the Solution

Cell Phone(s):

- cannot be used in the bath or shower
- service is not always reliable
- have a shorter battery life
- are not typically carried around the home
- dialing 911 requires pressing more buttons than with the Rescue Alert

your Medical Alarm System...

has 3 Components:

1. Your Personal Help Button (PHB) is a waterproof button that can be worn around the neck or wrist at all times. If help is needed, you simply press this button.

2. The Base Unit is activated once the PHB is pressed. It will automatically become a source for Two-Way Voice communication with the Emergency Response Center.

3. An Emergency Response Center Dispatcher will speak over the unit to ask if help is needed. This Dispatcher will obtain help catered to the situation.

*If the Response Center cannot make voice contact with the customer, they will still call for help.

Frequently Asked Questions

1. Who does the Response Center call?

We call 911, family, neighbors, and/or friends.

2. Is setup difficult?

No –Just plug the base unit into a phone jack and power outlet and press your button to test. Easy as that!

3. Do I have to have a medical emergency to use the Rescue Alert?

No –Rescue Alert provides help to thousands of people every day in a variety of different ways.

4. Does Rescue Alert offer medical alarm service in my area?

Yes –Rescue Alert is nationwide!

5. Will my system work with DSL, VoIP, or Cable Telephone System?

Yes –Rescue Alert is the only system specifically designed to work with all of these telephone connections.
